

Functional Dependencies

1. User

FD:

`userid → name, pin, address_line1, address_line2, country, city, state, email`

2. Email

FD:

`userid → email`

(Already part of the User table, but mentioned explicitly for clarity)

3. Payment

FD:

`payment_id → amount, payment_method, status`

4. Feedback

FD:

`feedback_id → rating, comments`

5. Send

FD:

`{sender, receiver, package_id} → sender, receiver, package_id`

(Composite key, only a trivial FD exists here)

6. Package

FD:

`package_id → status, weight, dimention, pickup_address`

7. Shipment

FD:

`shipment_id → pickup_time, delivery_time, status`

8. Tracking

FD:

`tracking_id → current_location, time_stanc, status`

9. Vehicle

FD:

`vehicle_id → vehicle_type, capacity, status`

10. Driver

FD:

`driver_id → phone_no, license_number, status`
